

UNIT –3

Name of the Topic: Fashion Terminology and Movement of Fashion

Course: AEC

Subject- Fundamentals of Fashion Design

Semester: 1st

Batch: 2025-27

Faculty of Design

Dr. Kalpana Munjal, Faculty of Design ,VGU, Jaipur

Major Fashion Capitals of the World

FASHION CENTERS

Major Fashion Centers of the World – A fashion capital assumes leadership role in clothing and design. In addition, fashion capitals usually have a broad mix of business, artistic, entertainment, cultural and leisure activities and are internationally recognized for having a unique and strong identity. It has also been noted that the status of a fashion capital has become increasingly linked to a city's domestic and international profile. Fashion capitals are also likely be part of a wider design scene, with design schools, fashion magazines and a local market of affluent consumers. Since the 16th century, Milan has been regarded as the Fashion Capital of the World. Nowadays, often the term fashion capital is used to describe the cities that hold fashion weeks, most prominently Paris, Milan, London, Rome and New York, to showcase their industry. Fashion capitals are cities that hold a dominant position in setting global fashion trends, hosting international fashion weeks, housing luxury brands, and serving as creative hubs for designers. They are also centers of fashion education, textile innovation, and retail markets.

Paris, France – The Eternal Fashion Capital- Paris's legacy in high fashion is indisputable and the city's fashion week is as prestigious as it gets. The city's legends include - deep breath - Louis Vuitton, Dior, Givenchy, Saint Laurent, Hermes, Lanvin, Balenciaga and Balmain, while avant-garde icons like Raf Simons, Rick Owens and Junya Watanabe showcase their collections in the French capital, too. Away from the high-end glitz and glamor, newcomer labels like AMI, Etudes and Maison Kitsuné present innovative twists on their nation's illustrious menswear heritage, and A.P.C. remain world leaders in all things chic. The Capsule trade show and Paris's many showrooms make sure plenty of business gets done, too.

Paris may be lacking in homegrown streetwear brands (barring Pigalle, of course), but as the high/low trend shows no sign of slowing down and upcoming labels continue to look to luxury houses for inspiration, the City of Love remains an utterly vital place for men's clothing -of all genres.

Historical Importance: Paris has been at the forefront of fashion since the 17th century, with the rise of haute couture in the 19th century led by Charles Frederick Worth.

Fashion Identity: Known for elegance, sophistication, and luxury. Paris epitomizes haute couture, luxury craftsmanship, and timeless chic.

Key Events: Paris Fashion Week (Haute Couture & Ready-to-Wear).

Major Designers & Brands: Chanel, Dior, Louis Vuitton, Givenchy, Yves Saint Laurent, Balmain.

Institutions: École de la Chambre Syndicale de la Couture Parisienne, Institut Français de la Mode.

Global Influence: Sets the gold standard for haute couture and remains the benchmark of luxury fashion worldwide.

Historical Evolution of Paris Fashion

- 17th Century Origins: Fashion in Paris gained prominence during the reign of Louis XIV, the “Sun King,” who emphasized luxury, fine dressing, and courtly elegance.
- 18th Century: Paris became Europe’s hub for dressmaking and luxury fabrics, influencing aristocratic fashion across the continent.
- 19th Century: The concept of haute couture was pioneered by Charles Frederick Worth in Paris, making it the birthplace of modern high fashion.
- 20th Century: Designers like Coco Chanel, Christian Dior, and Yves Saint Laurent revolutionized women’s fashion, shifting from corseted dresses to chic, modern silhouettes.
- 21st Century: Paris continues to be the benchmark for luxury fashion and hosts prestigious fashion weeks.

Paris Fashion Week

- One of the “Big Four” fashion weeks (along with Milan, London, and New York).
- Divided into Haute Couture Week and Ready-to-Wear (Prêt-à-Porter) Week.
- A platform where leading luxury houses and avant-garde designers showcase their collections.
- Attended by global fashion editors, celebrities, and industry leaders, it influences trends worldwide.

Fashion Institutions in Paris

- École de la Chambre Syndicale de la Couture Parisienne – Historic institution specializing in haute couture training.
- Institut Français de la Mode (IFM) – A leading global fashion school shaping future designers and entrepreneurs.
- Museums – Palais Galliera (Fashion Museum of Paris), Musée Yves Saint Laurent, Musée des Arts Décoratifs showcase Paris’ fashion heritage.

Milan as a Fashion Capital

Milan is widely regarded as the “Capital of Luxury Fashion and Craftsmanship”. It is known for its precision tailoring, high-quality fabrics, leather goods, and luxury accessories. Unlike Paris’ haute couture or London’s avant-garde, Milan’s strength lies in its luxurious practicality and timeless sophistication. Milan stands as a symbol of Italian luxury and craftsmanship. Its designers have redefined power dressing, sensual glamour, and luxury accessories. With its world-renowned fashion week, strong retail culture, and global luxury powerhouses, Milan continues to be a city where fashion is not just clothing but a lifestyle of elegance, prestige, and sophistication.

Historical Evolution of Milan Fashion

- **Early Origins:** Since the Renaissance, Italy has been famous for textiles, silk, and fine craftsmanship. Milan grew as an important hub of trade and luxury goods.
- **20th Century Rise:** After World War II, Milan emerged as a ready-to-wear fashion center, rivaling Paris’ couture dominance. Italian designers promoted elegant but wearable clothing.
- **1980s–1990s Boom:** Milan solidified its position with global luxury powerhouses like Armani, Versace, and Prada, making “Made in Italy” synonymous with prestige.
- **Today:** Milan continues to be the home of luxury brands, leather excellence, and modern tailoring that dominate global luxury markets.

Fashion Institutions in Milan—**Istituto Marangoni** – One of the world’s leading fashion schools.**Domus Academy** – Known for innovation and design thinking. **Polimoda (Florence, close to Milan)** – Focused on fashion business and design. **Museums & Districts:** Armani/Silos Museum, Museo del Costume, and Milan’s fashion district

Milan Fashion Week

- Part of the prestigious “Big Four” fashion weeks.
- Known for luxury ready-to-wear collections with emphasis on tailoring, accessories, and craftsmanship.
- Held twice a year (February/March & September/October).
- Attracts global buyers, celebrities, journalists, and trend forecasters.
- **Key Venues:** Via Montenapoleone, Piazza del Duomo, and other iconic locations.

London as a Fashion Capital- London is recognized as the “Capital of Creativity and Avant-Garde Fashion.” Unlike Paris’ elegance or Milan’s luxury craftsmanship, London stands out for its bold experimentation, cultural diversity, and youth-driven fashion movements. It is a breeding ground for radical design ideas and subcultural influences.

Historical Evolution of London Fashion

- 16th–17th Century: Under monarchs like Queen Elizabeth I, London fashion emphasized elaborate garments, ruffs, and embroidery, setting a precedent for regal style.
- 19th Century: London became associated with tailoring excellence — particularly Savile Row, which remains synonymous with bespoke men’s suits.
- 1960s (Swinging London): Designers like Mary Quant popularized the miniskirt, making London the center of youthful, modern fashion.
- 1970s–1980s: Punk culture, spearheaded by Vivienne Westwood and Malcolm McLaren, redefined fashion as rebellion.
- Late 20th to 21st Century: Designers like Alexander McQueen, Stella McCartney, and John Galliano transformed London into a hub of experimental luxury.
- Today: London continues to celebrate creativity, subcultures, and emerging designers.

London Fashion Week (LFW)

- One of the “Big Four” fashion weeks (with Paris, Milan, New York).
- Famous for supporting emerging designers through platforms like Fashion East and the British Fashion Council’s NewGen initiative.
- Known for risk-taking, creativity, and eclectic presentations.
- Designers showcase both ready-to-wear and experimental collections, often merging art and fashion.

Iconic Designers & Brands of London

- Vivienne Westwood – Pioneer of punk and rebellious fashion.
- Alexander McQueen – Known for theatrical, avant-garde designs.
- Burberry – Iconic British heritage brand, reinvented with modern luxury.
- Stella McCartney – Sustainability champion in luxury fashion.
- John Galiano – Known for innovative, dramatic design narratives.
- Contemporary Labels – JW Anderson, Erdem, Christopher Kane, Simone Rocha.

Fashion Institutions in London

- Central Saint Martins (CSM) – Produces some of the most influential designers worldwide (McQueen, Galliano, McCartney).
- London College of Fashion (LCF) – Known for fashion business, technology, and media programs.
- Royal College of Art (RCA) – Focused on design innovation and creativity.
- Victoria and Albert Museum (V&A) – Houses world-class fashion collections.

Global Influence of London as a Fashion Capital

- Innovation Hub: London sets trends by daring to experiment with silhouettes, textures, and cultural narratives.
- Street Style Influence: London's eclectic street fashion influences youth culture globally.
- Sustainability Movement: Many British designers champion eco-conscious fashion.
- Platform for New Talent: Unlike Paris and Milan's emphasis on heritage brands, London actively launches and nurtures new designers.

New York as a Fashion Capital

New York is often called the “Capital of Ready-to-Wear and Commercial Fashion.” Unlike Paris’ haute couture or London’s avant-garde creativity, New York is celebrated for practical, diverse, and business-oriented fashion. It has a powerful influence through its fashion week, garment industry, media, and retail market.

Historical Evolution of New York Fashion

- 19th–Early 20th Century: The Garment District in Manhattan developed as a hub for mass clothing production, making New York the center of ready-to-wear fashion.
- Post-WWII (1940s–1950s): Designers like Claire McCardell pioneered American sportswear, emphasizing practicality and comfort over European couture.
- 1970s–1980s: New York rose as a true global capital with designers like Calvin Klein, Ralph Lauren, and Donna Karan, blending luxury with commercial appeal.
- 1990s–2000s: Fashion became more diverse, reflecting New York’s multiculturalism, with growing streetwear and hip-hop influences.
- Today: New York remains a hub of fashion commerce, media, and diversity, where creativity meets business.

New York Fashion Week (NYFW)

- First among the “Big Four” fashion weeks each season (February & September).
- Established in 1943 as “Press Week” — the first organized fashion week in the world.
- Known for showcasing wearable collections that balance creativity with commercial viability.
- Features top designers as well as emerging labels.
- Attended by global press, buyers, celebrities, and influencers

Iconic Designers & Brands of New York

- Ralph Lauren – Embodies classic American elegance and lifestyle branding.
- Calvin Klein – Known for minimalism and iconic jeans/underwear campaigns.
- Donna Karan – Introduced “Seven Easy Pieces” for women’s wardrobes.
- Michael Kors – Jet-set luxury ready-to-wear.
- Marc Jacobs – Youthful, edgy, and eclectic collections.
- Tommy Hilfiger – Preppy, casual, American sportswear.
- Contemporary Leaders: Tory Burch, Thom Browne, Carolina Herrera, Alexander Wang.

Fashion Institutions in New York

- Fashion Institute of Technology (FIT) – Renowned for design, business, and technology programs.
- Parsons School of Design – Alma mater of Donna Karan, Marc Jacobs, Tom Ford, and many others.
- The Metropolitan Museum of Art (The Met) – Home to the Costume Institute and the annual Met Gala, a globally recognized fashion event.

Global Influence of New York as a Fashion Capital

- Business of Fashion: New York is a global hub for fashion retail, media, and marketing.
- Garment & Retail Industry: Still a powerhouse for mass-market and luxury fashion distribution.
- Streetwear Leadership: New York brands (like Supreme) and hip-hop culture influence global fashion trends.
- Fashion Media: Headquarters of Vogue, Harper’s Bazaar, and other influential publications.
- Inclusivity: NYFW is often more diverse in representation (size, ethnicity, gender) compared to other capitals.

FASHION TERMINOLOGIES

- **Apparel**" means clothing in general. In the rag trade, "apparel" is a generic description that covers menswear, womenswear, childrenswear and sportswear.
- **Style** A particular design, shape or type of apparel item. The style of the garment is determined by the distinct features that create its overall appearance.
- **Fashion** The display of the currently popular style of clothing. A fashion is the prevailing type of clothing that is favored by a large segment of the public at any given time and influenced by Social, Political, Economical and Artistic media.
- **Gathers** A means of distributing fullness in some part of a garment by sewing a loose row of stitches, pulling the thread, and sliding the fabric along the thread to make soft folds in order to decrease the width of the fabric. In shirring three or more rows of gathers are placed parallel lines to achieve a decorative effect while also manipulating fullness.
- **Classic:** An item of clothing that continues to be popular even though fashion changes. It is always acceptable. Classics were originally fashion items, but their general appeal and simple style lines have kept them popular. They can worn year after year. Examples of classics: White dress shirts, dark business suits, pleated skirts, loafer shoes, blue jeans, and salwar kameez.
- **Fad:** A temporary, passing fashion. It is an item or look that has great appeal to many people for a short period of time. A fad becomes popular fast, and then dies out quickly. Craze: Craze is like a fashion because it is a passing love for a new fashion. However, this has a display of emotion or crowd excitement with it.
- **Alter** To make different without changing into something else.
- **Designer** A fashion designer is responsible for creating the specific look of individual garments-including a garment's shape, color, fabric, trimmings, and other aspects of the whole. The fashion designer begins with an idea of how a garment should look, turns that idea into a design (such as a sketch), and specifies how that design should be made into an actual piece of clothing by other workers. Fashion designers attempt to design clothes which are functional as well as aesthetically pleasing.
- **Draping:** A technique of pattern making where the fabric is placed on the dress form and pinned to create a design. It is more 3Dimensional.
- **Model** A model is a person with a role either to promote, display or advertise commercial products (notably fashion clothing in fashion shows) or to serve as a visual aid for people who are creating works of art or to pose for photography. Though models are predominantly female, there are also male.

Evolution of fashion cycle

Fashion acceptance is usually described as a fashion cycle. The fashion cycle is usually depicted as a bell shaped curve with 5 stages.

1. Introduction
2. Rise in popularity
3. Peak of popularity
4. Decline in popularity
5. Rejection

Introduction of a style

- Most new styles are introduced in the high level.
- Designers creates the designs with few limitations on creativity, quality of raw material or amount of fine workmanship.
- The create new apparel and accessory style by changing elements like line shape color ect...
- Product costs are high and only few can afford.
- Production in small quantity gives the designer more freedom, flexibility.
- New products are shown to retail buyers and press.
- At the first stage of cycle, fashion implies only style and newness.
- Celebrities, TV stars, models buy these clothes as they want to wear them in some events.

Increase in popularity

- When new styles are seen worn by celebrities on TV or magazines they attract the attention of the general public.
- Viewers may wish to buy the new styles but perhaps cannot afford them.
- Manufactures use less expensive fabric and modify the designs to sell in low price.
- Some companies also do imitation of designer originals at low prices.
- High priced designers now have secondary sales line which sell at lower prices so they are able to sell adoptions of their original designs in great quantity.

Peak of popularity

- When fashion is at height of popularity it may be in such demand that more manufactures copy it or produce adaptations of it at many price levels.

Decline in popularity

- After so many designs copies are mass produced, people get tired of that style and begin to look for something new.
- Consumers still wear garments in style but they don't buy them at regular prices.
- Retail stores put declining styles on the sale rack.

Rejection of a style

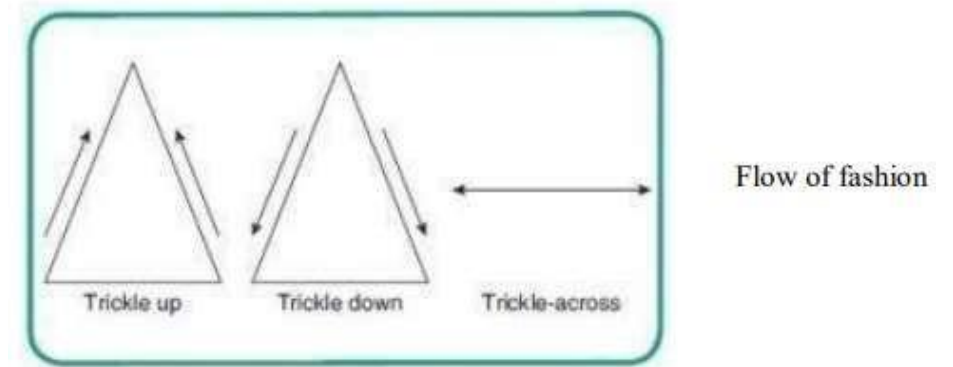

- In the past fashion cycle some consumers must have already turned to new look.
- The rejection of a style just because it is out of fashion is called consumers obsolescence.

Length of cycles

- Fashion always follows the same cyclic pattern.
- There is no measurable time table for a fashion cycle.
- Some takes short time to peak and popularity and some takes longer.
- Some decline slowly some very fast
- Some styles will sell in a single season some several seasons
- Some fashion fades quickly others never disappear.

The Flow of Fashion

The distribution of fashion has been described as a movement, a flow, or trickle from one element of society to another. The diffusion of influences from center to periphery may be conceived of in hierarchical or in horizontal terms, such as the trickle-down, trickle-across, or trickle-up theories.

Bottom-up / Trickle-up Theory It is also sometimes referred to as the trickle-up theory. Field (1970) proposed this theory of fashion. As per this theory, fashion moves from lower to upper socio-economic groups and from young to aged. The lower income youth have less social presence and hence less inhibitions, so they can freely create new dress patterns. People from the upper socio-economic group are secure and adopt only well-accepted dress patterns. Those in the middle socio-economic group are conservative and may accept clothing styles from lower or upper economic strata. This theory can also be represented in the form of a triangle with maximum acceptance at the base and fashion direction moving upwards towards the tip

Trickle-down Theory As the term suggests, this theory basically means that fashion moves from the higher class in the society to the lower class. In the earlier centuries, the fashion starters were royalty, the nobility in the palace would follow them and then it trickled down to the middle-class. The lower class did not follow them as they did not have the income, access to fashion and freedom to follow fashion. With time, the royalty became the fashion leaders and as this fashion was being adopted by the masses; new styles were introduced by the fashion leaders. This theory was accepted in the nineteenth century by some economists and was published as a step-by-step description by sociologist George Simmel in 1904.

Trickle-across Theory With the beginning of the twentieth century, fashion no more was restricted to a particular social class of people. Movie stars, television personalities, sportspersons, other public figures became inspirations for fashion as mass media spread during this period. King (1963) proposed a new theory of trickle-across in 1960s as trickle-down theory was no more relevant. This theory basically means that each group or segment of society has its own leader or leaders of fashion and that fashion is adopted simultaneously across segments unlike trickle-down theory.

Factors Favoring Fashion

These are macro factors that are outside an individual and prevail in the environment of the country or state. These factors are discussed below in brief.

Attempts for Profit- Manufacturers like to change fashion and this results in production and sale of clothing. A customer might feel like it is a wastage of money but from the manufacturer's point of view, it's a good reason to make customers buy clothes.

Spread of Fashion- There are various ways of spreading fashion like fashion shows, newspapers, magazines and television. Any new fashion shown at any of the mediums has the capacity to spread across and it depends on the rate at which fashion is spread and accepted by people.

Economic Independence- In the last century, only wealthy could follow fashion because of lack of funds. But in the twentieth century, there has been in general, increase in family income and therefore, more people follow what is in fashion.

Transport and Communication Facilities- Means of communication -television and internet have made spread of fashion instantaneous. Women and men can easily see and adapt the latest fashions on the internet. So, it does not take more than few weeks for an existing fashion to spread through the country.

Political Freedom- As a nation, if people face some taboos on what they should wear or restrictions based on their social status, spread of fashion becomes difficult. But in the twentieth century, with the empowerment of women, increased education and awareness, people have more freedom to choose and adopt new fashions and follow them.

Fashion Retarding Factors

Low Income- Fashion adoption wastes money and consumers that do not have sufficient income to spend on fashion, adopt fashion only when they reach the mass market and become affordable.

Religious and Traditional Limitations- Some religious leaders might not approve new fashions and hence the community may not adopt those fashions.

Absence of Favorable Conditions- If the factors mentioned in section 3.6 like well-established transport and communication channels are not available, spread of fashion is limited.

SOURCES OF FASHION INSPIRATION

Nature: Natural things around us are an inspiration for all designers.

Internet: Internet has become a part of our world and fashion industry is seeing a major shift in designs and trends. It is connecting the customers through various social media networks like Facebook, Twitter, Instagram etc. In fashion industry social media platforms are used to interact with the customers, as a way of building online presence but at the same time social media also influences designers in various ways that are changing the way many designers create their fashion. Web links provide latest information and knowledge and designers often look at websites for their inspiration.

Mass Media: Media in both the forms-print like newspapers and magazines and broadcast media like television and radio are an important source for getting information on latest trends and events from which ideas can be generated by designers/boutique owners.

Architecture and History of a Place: Since ancient times, designers have taken inspiration from ancient monuments, architecture of cities, historical people and their lifestyles, etc.

Forecasts: It refers to the colour and fabric forecast that acts as a guideline for all designers to create their designs. A lot of events like fairs and presentations of latest trends and upcoming colours and fabrics of the season are carried out to showcase forecasts.

Designer's Previous Collection: A designer's previous collections can provoke new ideas in a designer's mind to design his new collection. He may make modifications in his last collection and launch it as the next series of his last collection.

Travel and Tourism: Travel and tours to different locations can be a good inspiration for a designer as s/he becomes aware of a new lifestyle which can be his/her inspiration. These trips can be purposely planned or may be just for leisure or business trips

UNIT –IV

Name of the Topic: Business of Fashion
Course: Fundamentals of Fashion Design
Semester: 2nd/4th
Batch: AEC
Faculty of Design

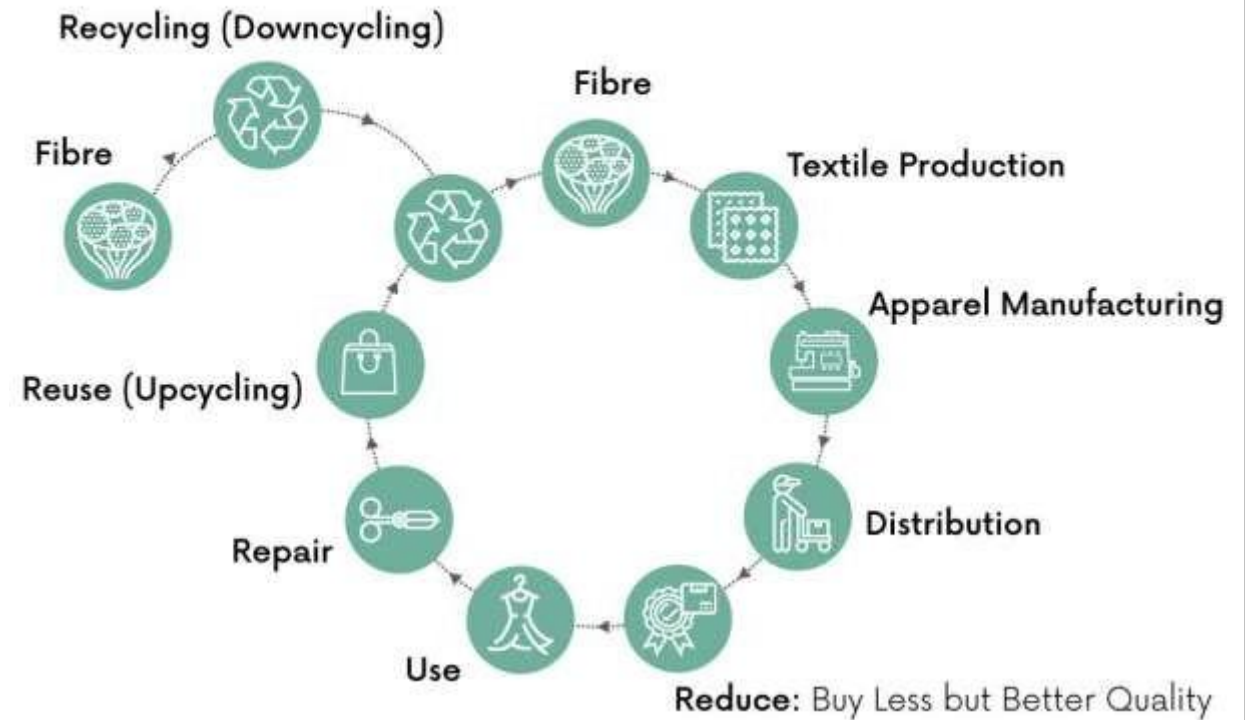

TOPIC 4

No.	Topic
1	Business of fashion • Economic importance • Government regulations • Indian fashion scenario.

ECONOMIC IMPORTANCE

- The economic impact of the fashion industry is huge.
- Altogether, fashion companies make up a multi-billion-dollar industry.
- This greatly benefits the economy because of the number of jobs that it creates, and the amount of money it generates.
- The fashion industry is not perfect. Some areas of it still in need of improvement.
- In other words, this is why it is important to be aware of important topics in the

Circular Economy Business Model

THE ECONOMIC IMPACT OF THE FASHION INDUSTRY: FAST FASHION

- Society and the fashion industry are more and more talking about Fast fashion.
- It has a huge impact on the economy.
- It is responsible for both the recent and future growth of the apparel industry.
- In fact, as of 2017, the market expected to grow by 5.91 percent.
- It also predicted to reach 1,652.73 billion dollars by 2020. However, the pandemic may have

THE PANDEMIC'S IMPACT ON FASHION ECONOMY

- The Covid-19 pandemic greatly impacted the fashion industry in a variety of ways. For example, e-commerce increased drastically in 2020.
- Because people had to stay home, they started buying clothes online.
- Fast fashion brands, such as H&M, reported increased online sales during the pandemic.
- Before the pandemic, the fashion industry produced about 1.2 billion tons of carbon emissions.
- This is not sustainable for the environment, even if it does benefit the economy.
- If more fashion companies try to be more sustainable, it will benefit the economy and the environment as well! This is why it is important to know about the economic impact of the fashion industry.

[Is Coronavirus setting new trends for the fashion ... \(reply.com\)](#)

THE STRUCTURE OF FASHION INDUSTRY

The apparel industry supply chain starts from the farming of cotton in the cotton fields, manufacturing of man-made fibers to selling clothes in retail store to the consumers.

1. Primary market
2. Secondary Market
3. Tertiary Market
4. Auxiliary Market

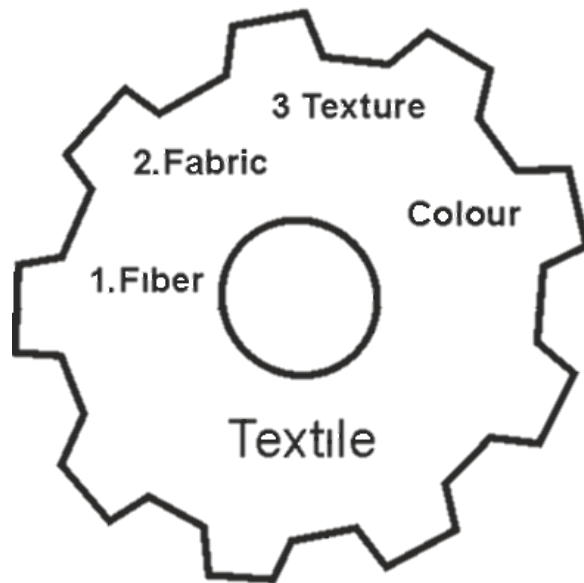

Primary Sector – Raw Materials

- Involves the production of fibers, fabrics, and trims.

- Includes natural fibers (cotton, silk, wool) and synthetic fibers (polyester, nylon).

- Textile mills, dyeing, and finishing units form the foundation of the industry

Primary market
(producers of material)

- 1st hand knowledge of raw material : fiber, fabric, fur, leather, plastic, metal, paper, etc. by mills, designer, manufacturers, retail

- Dyeing, finishing, buyers, & fashion, printing, weaving & directors novelty effects.

- Faber & fabric producers are called upon daily to make hard decisions & to participate in the forecasting process.
- Everything begins in the primary market !

Secondary Sector – Manufacturing and Production

- Converts raw materials into finished apparel, accessories, and footwear.
- Includes pattern making, garment construction, quality control, and packaging.
- Often located in industrial clusters or export zones in developing countries.

Secondary Market (Manufacturers)

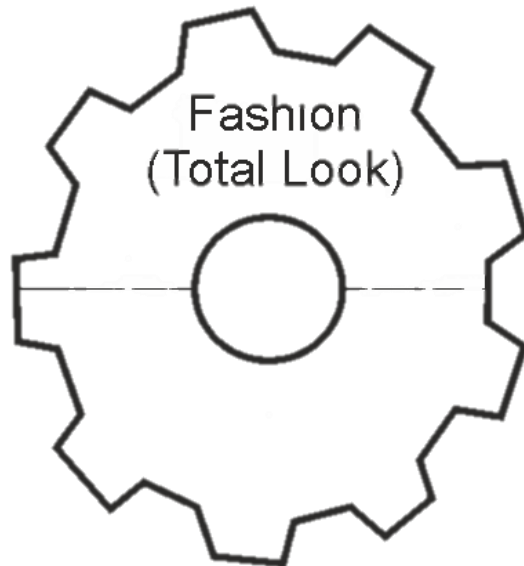

- Link between textile world & retailers. Brings garment to life.
- American manufactures very often have an arm of their business overseas. Foreign markets enable them to obtain cheap, skilled labor.
- Foreign production adds several months to planning stage, buying period & ultimately the delivery date.

If deliveries are too late, trend may have swerved in another direction & the crest of the selling wave is lost.

Tertiary Sector – Retail and Distribution

- Deals with marketing, merchandising, and retailing.
- Fashion is sold through multi-channel retailing: physical stores, e-commerce platforms, fashion shows, and pop-ups.
- Includes brands, boutiques, online marketplaces, and department stores.

Tertiary Market (retailers)

Level of Retailers.
Retailing is simply
the buying & selling
of merchandise at
profit.

The degree of profit is
the direct result of
astute market assessment,
thoughtful buying &
target marketing.

The retailer is like the
maestro of the industry
raising his baton in
direct response to the
musical score written by
the imaginative designer/
manufacturer

Quaternary Sector – Fashion Services

•Encompasses supporting industries such as media, trend forecasting, education, event management, styling, and technology (AI, virtual fitting, data analytics).

Auxiliary Market (retailers)

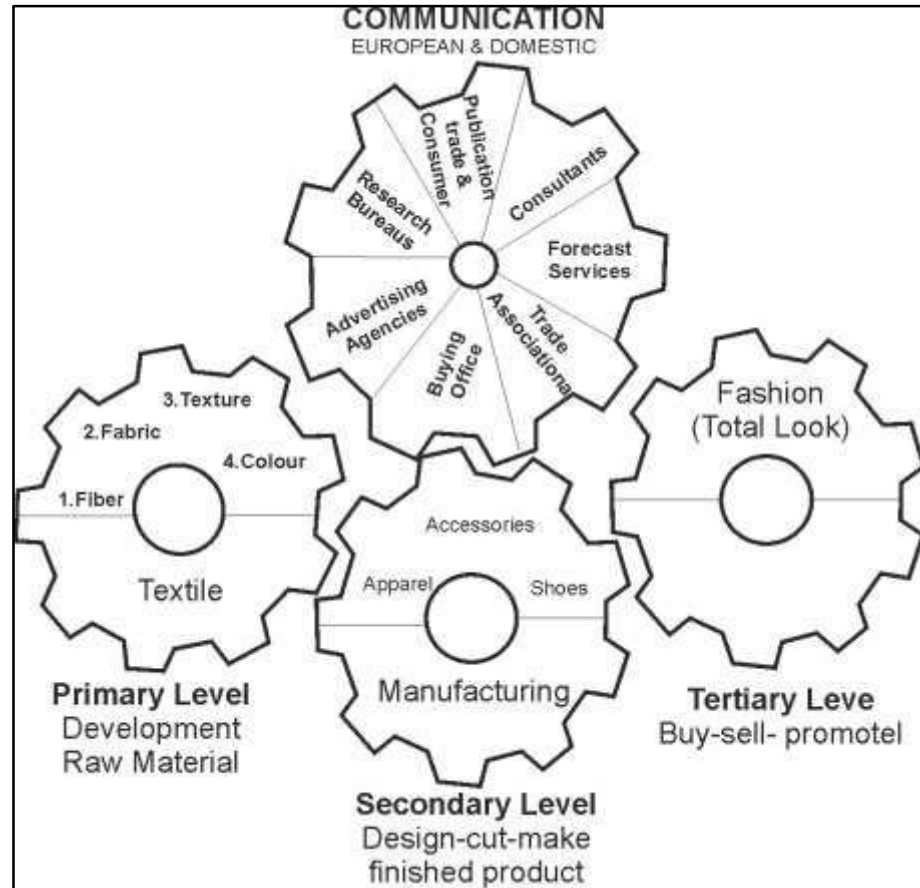

Lack of information causes lack of time energy, budget or basic knowledge.
Information can be found at:

1. Primary market
2. Secondary Market
3. Tertiary Market

The industries communicators also play a major role:

- The paid fashion services
- The trade papers & magazines
- The consumer magazines
- The buying offices
- The consultants
- The overseas office, agents & trade companies
- The corporate fashion director & co-ordinators
- The fashion group

3. INNOVATION

Government Regulations in the Business of Fashion

1. Introduction- The fashion industry operates within a framework of laws and regulations that govern how businesses are created, products are made, marketed, and sold. Government regulations ensure that the fashion business remains ethical, sustainable, transparent, and safe for consumers, workers, and the environment. Fashion, being a multidisciplinary and global industry, is affected by trade laws, labor laws, environmental rules, intellectual property rights, and consumer protection policies.

2. Major Areas of Government Regulation

a. Labor and Employment Laws

These ensure fair treatment, wages, and working conditions for workers in textile and garment sectors.

Key aspects include:

Minimum Wages Act (1948) – Ensures fair payment to garment workers.

Factories Act (1948) – Regulates health, safety, and working hours in production units.

Industrial Disputes Act (1947) – Addresses labor rights and conflict resolution.

Child Labour (Prohibition and Regulation) Act (1986) – Prohibits child labor in factories and workshops.

Equal Remuneration Act (1976) – Ensures equal pay for men and women in the fashion workforce.

Environmental Regulations– Fashion is one of the most polluting industries globally. Governments enforce environmental standards to reduce its ecological footprint.

Key laws and norms:

- Environment (Protection) Act (1986) – Framework for pollution control and sustainable manufacturing.
- Water (Prevention and Control of Pollution) Act (1974) – Regulates dyeing and washing units that discharge harmful effluents.
- Air (Prevention and Control of Pollution) Act (1981) – Controls emissions from textile mills and dyeing processes.
- Waste Management Rules (2016) – Includes handling of solid, chemical, and hazardous wastes.
- Sustainable Fashion Initiatives – Encouraged through certifications like OEKO-TEX, GOTS (Global Organic Textile Standard), and ISO 14001.

Trade and Export Regulations

Fashion is a global business, so trade laws and export policies are vital for international competitiveness.

Foreign Trade Policy (FTP) – Provides incentives for apparel and textile exports.

Export Promotion Councils (EPCs) like AEPC (Apparel Export Promotion Council) assist exporters with compliance, quality, and market access.

Customs and Import Duties – Governed by the Customs Act (1962).

Trade Agreements (FTAs) – Influence import/export tariffs and ease of business between nations.

Textile Policy and Schemes – Example: SAMARTH Scheme, TUFS (Technology Upgradation Fund Scheme), and PM MITRA Parks support modernization and competitiveness.

Intellectual Property Rights (IPR) – Protects the creative and design innovations of fashion professionals.

Key areas include:

- Copyright Act (1957) – Protects original artistic works like prints, patterns, and sketches.
- Designs Act (2000) – Protects the aesthetic design of garments, accessories, or textile motifs.
- Trademarks Act (1999) – Secures brand names, logos, and labels.
- Geographical Indications (GI) – Protects traditional crafts (e.g., Banarasi Sarees, Kanchipuram Silk, Bagru Prints).

Consumer Protection and Product Standards

- These laws ensure that products are safe, fairly priced, and of good quality.
- Consumer Protection Act (2019) – Protects consumers from misleading advertisements or substandard products.
- Legal Metrology Act (2009) – Ensures correct labeling, packaging, and pricing.
- Bureau of Indian Standards (BIS) – Sets quality standards for textiles, dyes, and safety parameters.
- Advertising Standards Council of India (ASCI) – Regulates truthful advertising and marketing

Taxation and Business Compliance

Every fashion business must comply with financial and commercial regulations:

- Goods and Services Tax (GST) - Simplifies tax structure for apparel and textile goods.
- Companies Act (2013) - Regulates business incorporation, governance, and reporting.
- Foreign Direct Investment (FDI) Policy - Allows foreign brands to invest in Indian retail (up to 100% under automatic route for single-brand retail).

Government Support and Development Initiatives

- To strengthen the fashion and textile ecosystem, the government introduces schemes such as:
- National Textile Policy
- Skill India / SAMARTH (Scheme for Capacity Building in Textile Sector)
- Make in India - Promotes domestic manufacturing.
- PM MITRA Parks Scheme - Establishes integrated textile and apparel manufacturing parks.
- Handloom and Handicraft Boards - Support traditional and craft-based fashion sectors.

Government Regulations of Business :

- Laws that regulate competition
- Labeling designed to protect customers

LAWS AFFECTING COMPETITION	PURPOSE AND PROVISIONS
Sherman Antitrust Act—1890	Outlawed monopolies. Outlawed restraint of competition.
Clayton Act—1914	Same purpose as Sherman Act but reinforced Sherman Act by defining some specific restraint—for example, price fixing.
Federal Trade Commission (FTC) Act—1914 (Wheeler–Lee Act of 1938 amended the FTC Act)	Established the FTC as a “policing” agency. Developed the mechanics for policing unfair methods of competition—for example, false claims, price discrimination, price fixing.
Robinson–Patman Act—1936	Designed to equalize competition between large and small retailers (i.e., to reduce the advantages that big retailers have over small retailers—outgrowth of 1930 Depression and growth of big chain retailers in 1920s). <i>Examples of provision of law:</i> 1. Outlawed price discrimination if both small and large retailers buy the same amount of goods. 2. Outlawed inequitable and unjustified quantity discounts (e.g., discounts allowable if (a) available to all types of retailers and (b) related to actual savings that vendor could make from quantity cuttings or shipments). 3. Outlawed “phony” advertising allowance monies—that is, advertising money must be used for advertising. 4. Outlawed discrimination in promotional allowances (monies for advertising, promotional display, etc.)—equal allowances must be given under same conditions to small and large retailers alike.
Cellar–Kefauver Act—1950	This law made it illegal to eliminate competition by creating a monopoly through the merger of two or more companies.
Product and Labeling Laws Designed to Protect Consumers Wool Products Labeling Act—1939; amended in 1984	Protects consumers from unrevealed presence of substitutes or mixtures. FTC responsible for enforcing law.
Fur Products Labeling Act—1951	Protects consumers and retailers against misbranding, false advertising, and false invoicing.
Flammable Fabrics Act—1954; revised in 1972	Prohibits manufacture or sale of flammable fabrics or apparel.
Textile Fiber Identification Act—1960; amended in 1984	Protects producers and consumers against false identification of fiber content.
Fair Packaging and Labeling Act—1966	Regulates interstate and foreign commerce by prohibiting deceptive methods of packaging or labeling.
Care Labeling of Textile Wearing Apparel Ruling—1972; amended in 1984, 1997	Requires that all apparel have labels attached that clearly inform consumers about care and maintenance of the article.

	Sole proprietorship	Partnership	Corporation	Trust
Ownership	A single owner	Two or more owners	Usually owned by many shareholders	Owner passes the ownership to a trustee
Profit or losses	All profits go to the sole owner	Profits split equally, or by pre-determined terms amongst the owners	Dividends declared and given to shareholders	Beneficiaries of the trust benefit from the profit
Liability	The owner has unlimited liability	Usually split amongst the owners based on the terms	Limited liability - individuals are not usually directly liable for activities within the corporation	The trustee responsible for operating the trust
Decision-making	All decisions for the firm are made by one owner	Owners in the partnership are responsible for the decisions	Board of director and shareholders	The trustee
Tax	Owner is taxed on his personal income/profit from the business	Owners are taxed on their respective incomes	A corporation is taxed as a "person"	A trust is taxed as a "person"

Types of Business ownership (adv & dis)

- **Sole Proprietorship (single owner)** : a business that can be owned and controlled by an individual, a company or a limited liability partnership.
- **Partnership (few owners)** : A business with two or more owners can be a partnership. Much like a sole proprietorship, forming a general partnership does not require filing any documents or taking any specific action.
- **Corporation (inc.) (Many owners)** : A business with multiple owners operates as a general partnership, by default, unless registered with the state as an LLC or corporation.

FORM OF BUSINESS OWNERSHIP	ADVANTAGES	DISADVANTAGES
Sole proprietorship (single owner)	• Ability to keep all profits • Simple in a business to operate • Ownership flexibility	• Unlimited financial liability • Management deficiencies • Lack of continuity
Partnership (a few owners)	• Ease of formation • Complementary management skills • Greater financial capacity than sole proprietorship • Less red tape than corporation	• Unlimited financial liability • Interpersonal conflicts • Lack of continuity if partner dies • Harder to dissolve than sole proprietorship
Corporation (Inc.) (many owners)	• Limited financial liability • Specialized management skills • Greater financial capacity than other forms of ownership • Economies of larger-scale operation • Easy to transfer ownership	• Difficult and costly form to establish and dissolve ownership • Tax disadvantages • Legal restrictions • Depersonalization

INDIAN FASHION SCENARIO.

- The Indian textile industry is estimated around 108 billion dollar and expected to reach 223 billion dollar by 2021.
- The industry also employs over 45 million people directly to 60 million people indirectly.
- The Indian Textile Industry contributes approximately 5 per cent to India's gross domestic product (GDP), and 14 per cent to overall Index of Industrial Production (IIP).
- The textile industry is also one of the largest contributor to India's export with approximately 13.5 percent of total export amounting 42.24 billion dollars.

ROBUST DEMAND

- * Cotton production in India is projected to reach 72 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers.
- * India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

COMPETITIVE ADVANTAGE

- * India enjoys a comparative advantage in terms of skilled manpower and in cost of production, relative to major textile producers.
- * In March 2021, Minister of Textiles, Ms. Smriti Irani announced that India will be fully self-reliant in silk production in the next two years.

POLICY SUPPORT

- * 100% FDI (automatic route) is allowed in textiles.
- * Production-linked Incentive (PLI) Scheme worth Rs. 10,683 crore (US\$ 1.44 billion) for manmade fibre and technical textiles over a five-year period.
- * The Indian government has notified uniform goods and services tax rate at 12% on man-made fabrics (MMF), MMF yarns and apparel, which came into effect from January 1, 2022.

INCREASING INVESTMENTS

- * Huge funds in schemes such as Integrated Textile Parks (SITP) (US\$ 184.98 million) and Technology Upgradation Fund Scheme (US\$ 961.11 million) released by the Government during 2015-16 to 2019-20 to encourage more private equity and provide employment.

Fashion Markets Around the World-The global fashion market is one of the largest and most dynamic industries in the world, valued at over USD 2.5 trillion. Fashion markets differ across countries and regions based on consumer behavior, cultural influences, climate, spending power, and retail formats. Understanding these markets helps designers and brands develop strategies that suit regional tastes, trends, and purchasing patterns.

United States of America (USA)

Market Overview

One of the largest fashion markets globally, valued at over USD 350 billion. Driven by consumer diversity, innovation, and fast fashion culture.

Key segments: casual wear, streetwear, sportswear (athleisure), luxury fashion, and sustainable fashion.

Key Fashion Hubs

New York City – Major fashion capital; hosts New York Fashion Week and home to top brands like Ralph Lauren, Calvin Klein, Tommy Hilfiger.

Los Angeles – Known for streetwear, denim culture, and celebrity-driven fashion.

Market Characteristics

Highly competitive with focus on branding, marketing, and influencer culture. Rise in sustainable and inclusive fashion. Dominance of e-commerce through platforms like Amazon Fashion, Nordstrom, and Revolve.

Consumer Behavior- Consumers value individuality, comfort, and convenience. High interest in ethical, gender-neutral, and eco-conscious fashion.

United Kingdom (UK)

Market Overview- Renowned for its heritage brands and street-style innovation, Valued at around USD 60–70 billion. London is one of the “Big Four” fashion capitals of the world.

Key Fashion Hubs-

London – Center for avant-garde and experimental design; home to brands like Burberry, Alexander McQueen, and Stella McCartney

Market Characteristics

Mix of high-street retail (e.g., Zara, H&M, Topshop) and luxury fashion. Focus on sustainability, craftsmanship, and ethical sourcing.

Strong online fashion retail sector (ASOS, Boohoo, PrettyLittleThing).

Consumer Behavior- UK consumers are trend-aware, price-conscious, and increasingly drawn to eco-friendly and gender-fluid designs.

United Arab Emirates (UAE)

Market Overview- A growing luxury and premium fashion market in the Middle East. Valued at approximately USD 12–15 billion. The UAE, especially Dubai, serves as the regional fashion hub for the Gulf Cooperation Council (GCC).

Key Fashion Hubs

Dubai – Hosts Arab Fashion Week, major malls, and international brand outlets.

Abu Dhabi – Emerging as a cultural and fashion destination.

Market Characteristics

High purchasing power and luxury brand preference (Chanel, Dior, Gucci).

Rapid growth in modest fashion — stylish, conservative attire aligned with cultural norms.

E-commerce expansion through Namshi, Ounass, and Farfetch Middle East..

Consumer Behavior- Consumers value status, exclusivity, and cultural elegance. Rising interest in modest wear designers (e.g., The Modist, Dolce & Gabbana Abaya line).

Europe (Continental)

Market Overview- Europe remains the epicenter of global fashion, housing many of the world’s most prestigious fashion houses and fashion weeks. Valued at over USD 400 billion, covering luxury, high-street, and couture segments.

Key Fashion Capitals

Paris (France) – Home to Haute Couture, brands like Chanel, Dior, Louis Vuitton.

Milan (Italy) – Known for craftsmanship and luxury tailoring; Gucci, Prada, Versace.

Berlin (Germany) – Focused on sustainable and contemporary fashion.

Madrid (Spain) – Home to Zara, Mango, and Massimo Dutti (fast fashion powerhouses).

Market Characteristics- Blend of luxury heritage and innovative design. Strong focus on craftsmanship, quality, and sustainability. European Union regulations promote eco-friendly manufacturing and ethical labor standards.

Consumer Behavior

- European consumers are style-conscious but increasingly environmentally responsible.
- Preference for timeless, quality garments over fast fashion.

Asia-Market Overview- Fastest-growing fashion market globally, Includes both manufacturing powerhouses (India, China, Bangladesh, Vietnam) and consumer markets (Japan, South Korea, China). Valued collectively at over USD 800 billion.

Key Fashion Hubs

China – Second largest fashion market after the U.S.; strong luxury consumption and domestic designer scene.

Japan – Minimalist aesthetics, street fashion, and avant-garde innovation (e.g., Comme des Garçons, Issey Miyake).

South Korea – Global trendsetter through K-fashion and K-pop influence.

India – Rich textile heritage, growing fashion retail sector, and evolving e-commerce market.

Singapore & Hong Kong – Regional retail and fashion trade centers.

Market Characteristics- Rapid expansion of fast fashion and online retail (Shein, Myntra, Flipkart, Tmall). Strong fusion of tradition and modernity (ethnic wear meets global trends). Rising focus on sustainability and local craftsmanship.

Consumer Behavior

- Youth-driven market with a focus on trend adoption, affordability, and individuality.
- High influence of social media, influencers, and celebrity endorsements.

3. Comparative Insights

Region	Market Type	Key Characteristics	Consumer Focus
USA	Mature	Innovation, Diversity, E-commerce	Comfort, Brand Value
UK	Mature	Heritage + Street Style	Sustainability, Trend Awareness
UAE	Emerging	Luxury, Modest Fashion	Status, Cultural Fit
Europe	Mature	Luxury Heritage, Craftsmanship	Quality, Eco-conscious
Asia	Growing Fast	Fusion of Local & Global	Trendy, Affordable, Youth-driven

Fashion markets worldwide differ in consumer taste, purchasing power, and cultural influence, but share a common shift toward sustainability, technology, and personalization. Designers and brands that understand these regional dynamics can successfully adapt their strategies, enhance market reach, and build global relevance.

NATIONAL & INTERNATIONAL DESIGNERS & THEIR BRAND IDEOLOGY

AN OVERVIEW OF THE GLOBAL APPAREL INDUSTRY

- **Introduction:**

Initially clothing was used to shield the human body from environmental conditions. emerged,, as the wheels of time started spinning, new trends emerged and manufacturing of fashionable garments came into existence. Apparel industry produces finished clothing such as kids garments, mens and womens clothing, and other intimate apparel. Manufacturing apparels is one of the most in-demand businesses today. Fads come and go, particularly in the fashion world. In order to remain competitive, apparel manufacturers seek to expand their business in various ways. Factors such as short product life cycle, volatile fashions, unpredictable market trends and impulse purchase nature of the customer are to be given utmost importance by the manufacturers so as to sustain themselves in the apparel segment.

- **Growth of the Industry:**

Apparel industry plays a pivotal role in developing a country's economy in terms of revenue generation and creation of employment. The industry is undergoing a drastic change due to global sourcing and high level of price competition. Favorable demographic factors, rise in disposable incomes, change in consumer behavior and a substantial shift towards branded apparel has resulted in a positive growth in the global apparel market. Global exports of apparel which was 108 billion USD in 1990, increased drastically to 453 billion USD in 2004, which is a positive of 138% increase

Apparel industry is more laborintensive. So the countries endowed with abundant labor power, has a promisingfuture for its nourished growth.

- **Apparel Manufacturers: Country-wise comparison:**

China has almost 50% of the market share of the total apparel manufacturing in a global perspective followed by India, Hong Kong Mexico, Philippines, Indonesia, Bangladesh and Srilanka.

- **China:**

China is the largest exporter in the world and is a major sourcing hub for apparels. Its economic policy and availability of cheap and abundant labor has made it climb up the apparel ladder. Their apparel exports have increased by 25% in 2006 from 2005. Economic policies regarding FDI have also helped China to increase its apparel exports to a considerable extent. Investment in machineries in the apparel sector is \$ 1 million.

Japan, Hong Kong and US are the largest importers of Chinese apparels. Short lead-time, larger capacity and well-developed infrastructure, availability of profuse and cheap labor and manufacturers flexibility in product offerings

- **India:**

India has an abundant supply of cotton and man-made fiber, a well-established production base, availability of cheap and skilled labor and creative designers. Besides, the Governments liberalization on FDI and export policies also nurtures the growth of apparel industry in India. India is considered as a best alternative for sourcing of apparel industry next to China by the global business giants. Chinese apparel and textile industry is not only lucrative for domestic players but is also attracting the international giants. The expected sourcing market is likely to be 25 billion USD in 2008 and is positively expected to grow by 35 billion USD in 2011. 2008 will witness the entry of new international brands in India. This will enhance layout of the domestic stores with global trends. International style malls will also provide new technology and comfort for the shoppers.

- **Emerging trend:**

Apparel manufacturers now concentrate more on the marketing and branding of their products. A branded product sells itself in the market. Less effort is needed to promote a branded product as the consumer trend now a days is leaning towards acquiring branded items. Some firms seek merging with other firms to sustain in the

•Conclusion:

Apparel industry represents a dynamic sector in the global trade. The performance of Asia-Pacific regions like China, India, Hong Kong, Philippines, Indonesia, and Bangladesh in the apparel sector is astounding. China is the largest manufacturer and exporter of apparels. Indias garment export sector has grown substantially since the elimination of quotas. Global exporters look at Turkey, South Korea and Mexico as alternate markets to China. Due to a rebound in FDI, Indonesian market has a healthy pace. Despite the competition from China and India, Bangladesh performance is noticeable in the post-quota period. Philippines apparel exports have a good market in USA. Consolidation through mergers and acquisitions creates opportunities for economies of scale. Consumer is aware of the current fashion trends through modern medias like television and Internet.

New business strategies are adopted by the apparel manufacturers to enhance trade. The industry is expected and estimated to grow in leaps and bounds and generate a considerable amount of revenue and employment in a global perspective.

He pioneered the use of **high-end luxury Indian textiles in a modern context**. His unique contribution was the use of classical methods like bandhani, gota work, block printing, hand dyeing etc. in construction of modern silhouettes. Sabyasachi is especially famous for Indian Bridal Wear.

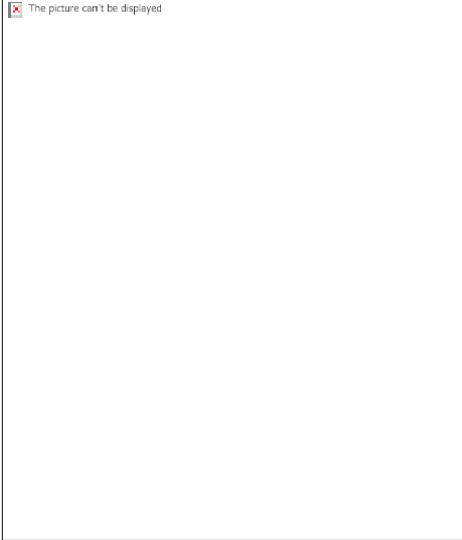

He always got himself attracted to designs, fashion and more and his inspiration was ace designer **Rohit Khosla**

Coco Chanel (Gabrielle Bonheur Chanel, 1883–1971) was a revolutionary French fashion designer who transformed women’s fashion in the 20th century. Rising from a modest background to building one of the world’s most influential luxury houses, Chanel is celebrated for her modern approach to elegance and comfort

Key Contributions

- Introduced liberating silhouettes that rejected the restrictive corset.
- Popularized jersey fabric for couture garments.
- Created timeless fashion staples such as the Chanel suit, little black dress (LBD), and quilted handbag.
- Launched Chanel No. 5 (1921), which became the world’s most iconic perfume.

Chanel Brand Ideology

Core Value	Explanation
Simplicity with sophistication	Believed, " <i>Simplicity is the keynote of all true elegance.</i> " Designs \ minimal yet powerful.
Freedom and comfort for women	Advocated for functional clothing enabling women to move and freely.
Timeless over trendy	Focused on classic pieces that remain relevant across decades, rejecting short-lived trends.
Luxury in everyday life	Elevated accessible materials into high fashion and believed luxu should feel effortless.
Empowerment and individuality	Encouraged women to express identity and confidence through

Manish Malhotra (born 1966) is one of India’s most celebrated fashion designers, known for redefining contemporary Indian couture and bridging the gap between Bollywood glamour and mainstream fashion. Beginning his career as a model and Bollywood costume designer, he gained fame in the 1990s for his innovative styling in Hindi cinema, transforming the visual aesthetics of film costumes.

He launched his eponymous luxury label in 2005, which has since become a leading name in Indian bridal wear, couture, and occasion fashion. His brand is synonymous with opulence, craftsmanship, and modern interpretations of traditional Indian textiles and embroidery.

Brand Ideology

Core Value	Explanation
Luxury rooted in Indian heritage	Revives Indian craft techniques such as zardozi, chikankari, gota, and kashmiri embroidery.
Cinematic glamour and storytelling	Designs inspired by Bollywood narratives, emphasizing drama, elegance, and visual impact.
Bridal grandeur and celebration	Specializes in statement couture for weddings and festivals, symbolizing cultural richness.
Modern Indian identity	Blends traditional silhouettes with contemporary fits, fabrics, and global aesthetics.
